## Editor-in-Chief

Prof. Dr. Frank L. Dorman

## Message from the Editor-in-Chief

*Separations* offers the scientific community a high-quality, open-access journal option with rapid time-to-publication without any sacrifice of a rigorous peer-review process. We invite contributions ranging from fundamental characterization and instrumentation development through application of techniques to shed light on a broad spectrum of separation science needs. Since inception, *Chromatography*, has become unique in its combination of rapid publication and thorough scientific content. We invite you to consider us for your next contribution.

## Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **High Visibility** Science Citation Index Expanded (Web of Science); Emerging Sources Citation Index (ESCI)
-  **Thorough Peer-Review**
-  **Fast Manuscript Handling Process** Immediate publication upon acceptance
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

## Aims and Scope

*Separations* provides an advanced forum for separation and purification science and technology in all areas of chemical, biological, and physical science. It publishes reviews, regular research papers, and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced.

The scope of *Separations* includes:

- Theory and methodology
- Equipment and techniques, novel hyphenated analytical solutions
- Novel analysis approaches and applications
- Computational modeling of separations for the purpose of fundamental understanding and/or chromatographic optimization
